

## Formiva Environmental Policy

Formiva Automotive Parts Industry and Trade. Inc. As a sustainable development company, we are aware that the protection of the environment and the efficient use of our natural resources are essential for our future, and in all our processes;

- Protecting natural resources and saving raw materials, energy, water, etc. We will use our basic resources efficiently, carry out efficiency studies on water quality and management, and work to reduce greenhouse gas emissions,
- We will carry out decarbonization studies,
- We undertake to carry out greenhouse gas reduction projects according to ISO 14064-2 standard
- We declare that we will calculate Greenhouse Gas emissions and have them approved by an accredited organization.
- We will benefit from renewable energy sources and carry out energy efficiency studies,
- We will consider all activities carried out as opportunities for reducing soil, water and air pollution and for continuous development,
- Utilizing excess domestic food for animal welfare and not harming animals' living spaces,
- We will separate and recycle waste at its source,
- To use chemicals without harming the environment and to dispose of them appropriately,

- We will implement reuse and recycling projects with sustainable resource management,
- Not to harm biodiversity, animal habitats and forests,
- Reducing noise emissions,
- Increasing our environmental performance and taking environmental impacts into consideration in our new investments,
- Communicating with all stakeholders and sharing information when necessary,
- To consider all activities carried out as opportunities for reducing environmental pollution and continuous development,

We are committed to fulfilling our legal obligations
