

## Waste Management Policy

As Formiva Automotive Inc., our goal is to use production technologies that create the least amount of waste within the scope of the business's influence, to reduce the amount of waste, to prevent waste from being thrown into nature and the environment, to collect, transport, store, remove, recycle waste and to discipline the management of consumer goods that may negatively affect the environment, to prevent waste that may occur in unexpected situations and pollutants that have a permanent effect in the air, water and soil from disrupting animal and plant species, natural riches and the ecological balance.

Our strategies;

- To define systematic activities carried out to develop environmental awareness among our stakeholders and to provide information about the process,
- To create and develop environmental awareness among our social stakeholders, namely employees, suppliers, customers and the society,
- To obtain ISO 14001 and ISO 14064 certificates,
- To recycle our waste by separating it at its source and to increase recycling rates,
- In all our processes, our priority is to prevent, reduce and reuse all possible waste at its source and to ensure that these wastes are collected, transported and disposed of in a way that will not harm human health and the environment,

We will continuously aim for improvement in order to be more effective in waste management by reducing our environmental impacts. This policy reflects our commitments to Formiva employees, suppliers and the society.
